

Motivational Model

Motivational Model V1

This motivational model is a proposal of our solution to our client's issue. Our team tried to narrowed down the scope that was proposed by the client and identified 6 key attributes of the system (User Story Epics): Set-up smart contract, Manage smart contracts, Access Apollo's Social Media Platform, Check gig-list, Administrate social media platform, Account creation & management. These 6 key attributes are further broken down to, with our current understanding of the project, the most atomic feature possible. This model will help us shape our User Stories and Acceptance Criteria that will be used to build our Product Backlog.

SVG version of the Goal Model (if the one above is not clear enough)

Goal Model Google Drive Link to access the Draw.io file of the Motivational Model
